# PRELIMINARY REPORT

TO HIS EXCELLENCY,  
EPHRAIM F. MORGAN,  
GOVERNOR OF WEST VIRGINIA.

SIR:—I herewith submit to you my Second Annual Report of the Department of Mines, it being the thirty-ninth annual report of the condition of the coal industry of the State. The period covered by the statistics shown therein is for the fiscal year beginning July 1, 1920, and ending June 30, 1921.

This report will show an increase in the production of coal, as well as in the number of employees, and a decrease in the production of coke, with a like decrease in the coke workers, and a decrease in the number of days worked in both branches of the industry. The beginning of the fiscal year found the various operations of the State in the most prosperous condition they had ever experienced both as to demand for their product and as to their ability to secure competent help. This condition prevailed throughout the first half of the year, but the latter part of the year, with the closing of the factories throughout the country, coupled with the general unrest experienced since the closing of the great war, were such as to greatly curtail production, and thus cause only a moderate increase in the production of coal for the year.

During the year covered by this report there were 993 companies reporting 1,570 operating mines, which, together with the small wagon mines, produced 80,761,604 gross tons of coal, an increase over the coal produced the previous year of 770,288 gross tons.

Below you will find a comparison of the production of coal and coke for the fiscal years 1920-21, together with the increase of same:

	1921	1920	Increase or Decrease	Change in Per Cent.
Coal.....	80,761,604	79,991,316	770,288 (I)	0.96 (I)
Coke.....	836,728	1,172,217	335,489 (D)	28.62 (D)

You will note from the above that the production of coal for the year covered by this report has increased 770,288 gross tons over the year 1920, while the production of coke during the same period has decreased 335,489 net tons.

## INSPECTION DISTRICTS

The inspection districts remain the same as last year, although two changes were necessary in the inspection force, caused by resignation of inspectors. J. G. Vaughan resigned as inspector of the eleventh mining

district and was succeeded by Mr. W. D. Lee. Edward Nicholson resigned as inspector of the twelfth inspection district and was succeeded by Mr. A. P. Burdiss. The Inspection Districts at the end of the fiscal year were as follows:

### PRODUCTION OF COAL AND COKE

During the year 993 firms representing 1,570 producing mines, together with the small country and wagon mines, reported a total production for the fiscal year ended June 30, 1921, of 80,761,604 gross tons, an increase of 770,288 gross tons, or 0.96 per cent. over the year ended June 30, 1920. Within this same period the coke manufactured in the State amounted to 836,728 net tons, which is a decrease under the preceding year of 335,489 net tons, or 28.62 per cent. Below you will find the estimated value of the production of both coal and coke for the past year:

TOTAL..... 171,432 Acres

The mines of the State average 155 days during the past year as against 182 for the preceding year.

### COKE OVENS AND COKE PRODUCED

There were 45 coke plants operated in the State during the year, which reported a total of 7,391 coke ovens, of which number 3,955 were in actual operation, there being 3,439 ovens not in use during the year.

There were 1,257,065 gross tons of coal converted into coke which gave a yield of 836,728 net tons of coke and gave employment to 1,050 persons. The decrease in the production of coke as compared with the previous year was 335,489 net tons, but at an increased valuation of \$560,554.12. The average price per ton of coke was \$9.58, an increase of \$3.22 per ton over the preceding year.

### MEN EMPLOYED

During the year there were employed at the mines and coke ovens within the State an average of 116,726 persons, an increase over the previous year of 19,300. Of the total number employed there were:

17,140 .....	Pick Miners
39,522 .....	Machine Miners
6,052 .....	Machine Runners and Helpers
32,778 .....	Inside Laborers
20,184 .....	Outside Laborers
1,050 .....	Coke Workers

Counting the superintendents, mine foremen, fire bosses, store managers, store and office clerks, it would be safe to add five persons per mine, employed in these capacities. Basing this estimate on 1,570 producing mines, it would make a total of 7,850 persons, or a grand total of employees directly connected with the operation of the mines of 124,576.

The nationalities of the persons employed in and around the mines are given in a tabulated form in another part of this report and the totals of the various nationalities are as follows:

American (White).....	64,373
Negroes.....	20,781
Italians.....	8,078
Hungarians.....	5,161
Polish.....	3,492
Slavish.....	1,641
Austrian.....	2,225

Russian.....	2,280

Spanish.....	2,212
Other Nationalities.....	5,368
TOTALS.....	116,726

### SHIPMENTS OF COAL AND COKE

For the year ended June 30, 1921, the operating coal companies of the State reported 75,302,368 gross tons of coal and 836,728 net tons of coke as being shipped over the railroads from the mines in the State. They also reported for the same period 874,494 gross tons of coal as being shipped by river. 809,848 tons of which originated and was floated down the Great Kanawha and 64,646 gross tons were shipped on the Ohio River. This does not include the tonnage of fuel consumed by water craft and local river trade. There was no coal shipped on the Monongahela River and no coke was shipped by water, either on the Kanawha, Monongahela or Ohio Rivers during the year.

### SELLING PRICE OF COAL AND WAGES PAID

During the year the average price received by pick miners throughout the State for mining run-of-mine coal was 95 cents as against 91 cents in 1920, this being an increase of 4 cents per ton. The average tonnage produced by each pick miner was 1,227 tons, a decrease of 368 tons under the fiscal year 1920. The average annual wage of pick miners (all pick miners included) was \$1.165.65, which was a decrease of \$285.80 under that of 1920.

The average selling price of coal shipped from the mines of the State was \$4.65 per gross ton run-of-mine coal, which is an increase of \$1.25 per ton over the price received last year. Coke was sold f. o. b. at the ovens during the year at an average price of \$9.58 per net ton, which is an increase over the previous year of \$3.22 per ton.

### ACCIDENTS

There were 346 lives lost in connection with the mining industry of the State during the year ended June 30, 1921. Of this number 314 were killed inside the mines and 32 outside, or a net total increase of 26 during that period.

The increase in the number of fatal accidents has been very disappointing to this department as special attention has been given this phase of the work and at all times we sought to impress both employer and employe with the importance of using every precaution to avoid dangerous conditions and to exercise all diligence in the prevention of unnecessary accidents. A large percentage of the accidents occurring in this State are caused by carelessness and neglect. During the last six months of the year when the mines were not running regularly, men were often sent into the mines without a proper examination of the working places and when they were so sent worked regardless of conditions and did not make any attempt to make their places safe. This resulted in many unnecessary accidents which could have been avoided

had proper care been taken and a reasonable amount of "Safety First" methods adopted. We still continue to send to each operating company a monthly report of all fatal accidents occurring at the mines, with the end in view of showing just how these accidents occurred that they may be avoided in the future. This report shows the name of the company and mine at which the accident occurred, together with the name of deceased, the date and cause of the accident and such other information as may be pertinent.

The system of mining institutes which was put into operation last year is continued and particular attention is given to all subjects relating to "Safety First" methods and all things which tend to increase the efficiency and safety of the men employed. The institutes have been fairly successful and well attended, and are growing in popularity throughout the State.

There were 842 non-fatal accidents at the mines during the year, 710 of which were inside the mines and 132 outside, thus showing a decrease in non-fatal accidents of 6 under the previous year.

Below is a comparison of fatal and non-fatal accidents during the fiscal year 1920-21.
